

TFT

Trang Hồ sơ người chơi

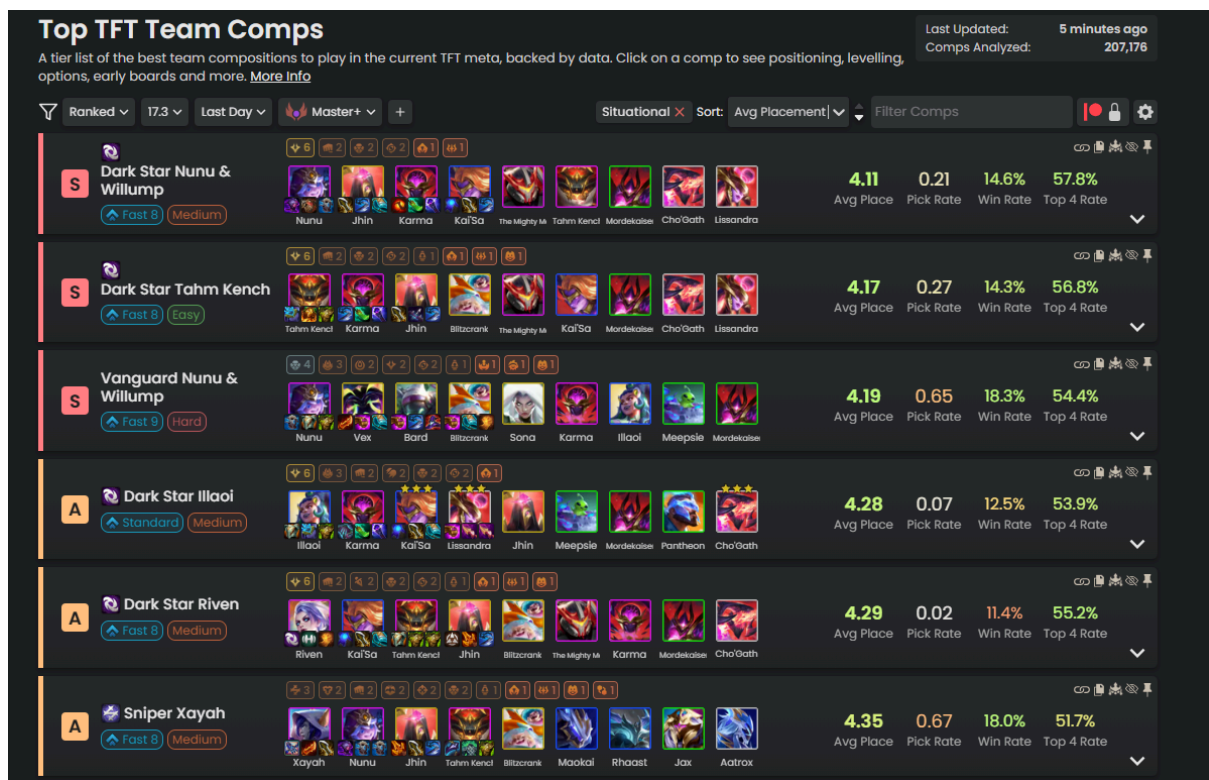

Thông số dễ: Có filter theo all game, 20 game, 50 game, 100 game gần nhất

- Lịch sử đấu, số game, số game top 4, số game top 1, hạng trung bình
- Với mỗi tướng, mỗi tộc/hệ và mỗi trang bị, tính số game dùng, số game top 4, số game top 1, hạng trung bình, lên được bao nhiêu điểm rank.

Thông số khó: Cần phải nghĩ ra công thức, hiện tại chưa nghĩ ra

- Độ lấp đồ chuẩn của người chơi
- Độ người chơi đánh theo meta
- Độ flex: Spam 1 đội hình hoặc mỗi trận 1 đội hình

Trang top đội hình meta

Với mỗi đội hình, cần số game top 1, số game top 4, hạng trung bình, pick rate

Vấn đề:

- Làm sao tìm ra một số con core của đội hình đó? (Chuyên gia hoặc một công thức nào đó)
- Đồ cho chủ lực trong đội hình đó (Chuyên gia và thông số)
